

WHAT IS CLAIMED IS

5

1. A facsimile apparatus configured to exchange email data via a network, comprising:
 - a system control unit which controls an operation of the facsimile apparatus;
- 10 a communication management unit which stores communication management information in response to occurrence of a facsimile communication;
- 15 an address registration unit which registers an email address to which email is transmitted; and
- a data-format conversion unit which converts the communication management information stored in said communication management unit into data in a text format,
- 20 wherein said system control unit sends the communication management information in the text format to the email address registered in said address registration unit by email.

25

2. The facsimile apparatus as claimed in
claim 1, wherein the text format is the CSV format.

5

3. The facsimile apparatus as claimed in
10 claim 1, wherein said system control unit requests
said data-format conversion unit to convert the
communication management information stored in said
communication management unit into data in the text
format in response to a detection that transmissions
15 and receptions have occurred more than a
predetermined number of times.

20

4. The facsimile apparatus as claimed in
claim 3, wherein said system control unit determines
according to a user parameter whether to send the
communication management information in the text
25 format to the email address in response to the

detection that transmissions and receptions have occurred more than a predetermined number of times.

5

5. The facsimile apparatus as claimed in
claim 1, wherein said system control unit outputs
the communication management information on a sheet
10 of paper if the email transmission of the
communication management information fails.

15

6. The facsimile apparatus as claimed in
claim 1, wherein only a portion of items of the
communication management information are converted
into data in the text format, and are sent to the
20 email address registered in said address
registration unit by email.

25

7. The facsimile apparatus as claimed in
claim 6, wherein said portion of items include at
least one of a date of facsimile transmission and/or
reception, a time thereof, a destination of
5 facsimile transmission, an originating source of
facsimile transmission, a communication mode, a
number of pages, communication results, and a user
code.

10

8. The facsimile apparatus as claimed in
claim 6, wherein the portion of items are specified
15 by use of a terminal connected to said facsimile
apparatus.

20

9. The facsimile apparatus as claimed in
claim 1, wherein said system control unit sends the
communication management information in the text
format to the email address by email at a specified
25 time.

5 10. The facsimile apparatus as claimed in
claim 1, wherein said system control unit sends the
communication management information in the text
format to the email address by email when specified
conditions are satisfied.

10

11. The facsimile apparatus as claimed in
15 claim 10, wherein the specified conditions are
satisfied when a number of facsimile transmissions
to a specified address exceeds a predetermined
number.

20

12. The facsimile apparatus as claimed in
claim 10, wherein the specified conditions are
25 satisfied when a number of facsimile transmissions

during specified hours exceeds a predetermined number.

5

13. The facsimile apparatus as claimed in
claim 10, wherein the specified conditions are
satisfied when a number of facsimile transmissions
10 longer than a specified communication time exceeds a
predetermined number.
